

Chapter 2

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 2: How AI is Shaping the Future of Work

This worksheet is designed for high school students (Class 9-12) as part of the course “AI & Future Work Preparedness.” It includes a variety of activities to reinforce the concepts covered in Chapter 2, encourage critical thinking, and engage students in interactive learning. The worksheet can be used for individual work, group activities, or class discussions.

Part 1: Concept Mapping (Visual Summary)

Instead of short answers, create a concept map to connect the main ideas from the chapter. In the space below or on a separate sheet, draw a central bubble labeled “AI and Future Work.” Branch out with at least 4 key topics from the chapter (e.g., “Job Changes,” “Industries Impacted,” “New Skills,” “Challenges”). For each topic, add 1-2 specific details or examples (e.g., under “Challenges,” write “Job Displacement – self-checkout machines”). Use lines to show how ideas connect if relevant.

Concept Map Space:

(Alternatively, use a separate sheet for more space and attach it.)

Part 2: True or False with Justification

Read the statements below about Chapter 2 content. Mark each as True (T) or False (F), and write a brief justification (1-2 sentences) explaining why you chose your answer based on the chapter.

- **AI is only replacing jobs and not creating any new ones.** T / F Justification: _____
- **AI is transforming industries like healthcare by assisting with tasks such as diagnosing diseases.** T / F Justification: _____
- **Creativity is a skill that AI can fully replicate, so humans don't need to focus on it for future jobs.** T / F Justification: _____
- **Learning to code is unnecessary for teens since AI will handle all technical tasks in the future.** T / F Justification: _____
- **Job displacement due to AI automation is a challenge that affects workers differently across the world.** T / F Justification: _____

Part 3: Interactive Activity – Timeline of Jobs

Create a timeline that shows how jobs have evolved over time and predict future changes due to AI. Use the space below or a separate sheet if needed.

- **Past (100+ years ago):** Name a job that existed and describe it briefly (e.g., scribe – writing by hand).

- **Present (today):** Name a job that uses technology or AI and describe how (e.g., social media manager – uses AI for trends).
- **Future (2030-2050):** Imagine a job that might exist because of AI and describe it (e.g., robot therapist – helps with emotions).
- **Bonus (optional):** Draw a small doodle next to each job to show what it might look like. (Use the space below or a separate sheet for drawings.)

Timeline Space for Additional Notes or Sketches:

Part 4: Critical Thinking – Thought-Provoking Scenario

Read the scenario below and answer the question in 4-5 sentences. Think about both the opportunities and challenges discussed in the chapter.

Scenario: Imagine it's the year 2050, and you're applying for a job as a Game AI Developer. Your first task is to design a villain in a video game that learns from the player's moves and gets tougher each time. The company wants someone who can blend creativity with tech skills.

Question: What kind of villain would you design (e.g., a dragon, a hacker, a zombie)? How would you use AI to make it challenging for players? How do you feel about combining creativity and technology in this role?

Part 5: Skill-Building Plan – Personal Reflection

The chapter discusses skills like coding, creativity, and adaptability as crucial for future jobs. Create a mini-plan to build skills for an AI-driven world.

- **Technical Skill to Learn (e.g., coding, data analysis):** _____
 - One small step to start this week (e.g., watch a 10-minute coding video): _____
- **Soft Skill to Improve (e.g., creativity, teamwork):** _____
 - One small step to start this week (e.g., lead a group project): _____
- **Why do you think these skills will help you in the future?** (2-3 sentences)

Part 6: Creative Project – Design an “AI Job of 2050”

Invent a future job related to AI. Use your imagination! Answer the questions below and, if possible, draw a quick sketch of someone doing this job (use the back of this sheet or a separate paper).

- **Job Title:** _____
- **What does this job do?** (e.g., helps people with something using AI)
- **What skills are needed for this job?** (e.g., coding, communication)
- **How does this job help society or make life better?**

Part 7: New Addition – AI Impact Debate Prep

Prepare for a mini-debate on AI's impact on future work. Choose one side of the argument below and write 3 points to support your position. You can use examples from the chapter or your own ideas. This activity can be used for a class debate or discussion.

Topic: “AI will create more opportunities than challenges for teens entering the workforce.”

- **Choose your side:** I agree / I disagree (circle one)
- **Point 1:** _____
- **Point 2:** _____
- **Point 3:** _____

Optional: If participating in a class debate, note one counterargument you expect from the other side and how you might respond to it.

- **Counterargument:** _____

- **Your Response:** _____
