

Chapter 10

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 10: Capstone Project and Future Learning

This worksheet is designed to help you review and apply the key concepts from Chapter 10 through a variety of questions and activities. Complete these tasks to solidify your understanding of planning a project, using your coding skills, presenting your work, and exploring future learning opportunities

Part 1: Short-Answer Questions

Answer the following questions in 2-3 sentences each. Be clear and specific.

- **Why is planning important before starting a coding project like an app or game?**
- **Name one coding skill you've learned in this course, and explain how you could use it in your capstone project.**
- **What is one benefit of presenting your project to peers or mentors?**

Part 2: True or False Questions

Read each statement carefully and circle **True** or **False**. If the statement is false, write a brief correction in the space provided.

- **Planning a project before coding helps save time and keeps you focused.** True / False Correction (if False): _____
- **Databases are only used to make apps look more colorful and attractive.** True / False Correction (if False): _____
- **Joining online coding communities like Scratch can help you share projects and get feedback.** True / False Correction (if False): _____

Part 3: Practical Activity

Project Brainstorm: Think of a simple idea for your capstone project (an app, game, or website). Write a short plan for it by answering the questions below.

- **Project Idea:** What will your project be? (e.g., a game, a homework tracker)
- **Purpose:** What problem does it solve or why is it useful?
- **Main Feature:** What is one key thing it will do? (e.g., log tasks, play a mini-game)
- **Tool:** What tool or language will you use to build it? (e.g., Scratch, MIT App Inventor)

Part 4: Reflection

Future Learning: Reflect on your coding journey and future goals. Write a short response (3-4 sentences) about what excites you most about coding after this course and one advanced topic (like databases or AI) you'd like to

explore next. Also, name one resource (like Code.org or YouTube) you'll use to keep learning.

Note for Students: Take your time to complete this worksheet thoughtfully. Discuss your answers or project ideas with classmates or a mentor for extra inspiration. Save this worksheet to look back on as you start your capstone project and continue your coding adventure. Keep creating and learning!
