

Chapter 9

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 9: Participating in Coding Challenges and Hackathons

This worksheet is designed to reinforce key concepts from Chapter 9 through short-answer questions, practical activities, and reflection tasks. Complete these exercises to deepen your understanding of coding challenges and hackathons.

Part 1: Short-Answer Questions

Answer the following questions in 2-3 sentences each. Be specific and use examples where possible.

- **What are coding challenges, and how do they differ from hackathons?**
- **Name one beginner-friendly platform for coding challenges or projects, and describe why it's suitable for high school students.**
- **What is one important tip for preparing for a coding challenge, and why does it help?**

Part 2: Practical Activity

Mini Coding Challenge Plan: Imagine you're participating in a coding challenge on a platform like Code.org or HackerRank. Pick a simple problem (e.g., "Print your name 5 times" or "Add two numbers"). Write a short plan or pseudocode for solving it. If you know a programming language, include a small code snippet. (3-5 lines)

Problem Chosen: _____ **Plan or Code:**

Part 3: Creative Team Task

Hackathon Team Brainstorm: Pretend you're forming a team for a hackathon with a theme of "Tech for School Life." Come up with one app or project idea to solve a school-related problem (e.g., homework tracking). List the idea and assign roles for a team of 3 people (including yourself). (3-5 sentences)

Project Idea: _____ **Description and Roles:**

Part 4: Reflection

Personal Growth: Think about how participating in a coding challenge or hackathon could help you grow as a coder. Write a short reflection on what excites you most about these events and one skill you'd like to improve through them. (2-4 sentences)

Note for Students: Complete this worksheet individually or discuss with classmates for deeper insights. Save your answers to track your progress, and revisit them after participating in a real coding event to see how your ideas evolve. Keep coding and challenging yourself!
