

Chapter 9

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 9: Building Resilience and Problem-Solving Skills

Hey, high schoolers! This worksheet is designed to help you apply the key concepts from Chapter 9. It includes a mix of reflective questions, scenario-based activities, and interactive challenges to reinforce your problem-solving mindset, confidence in emergencies, and long-term resilience. Grab a pen, get creative, and let's solidify those crisis-ready skills! Complete this on your own or with a friend for extra fun. Aim to finish in 30-45 minutes.

Part 1: Reflective Questions

Answer the following questions in a few sentences each. Think about how these skills relate to your life as a teen.

- **Assessing Situations Quickly** Think of a time when you had to make a quick decision (could be a small stress moment like missing a bus or forgetting homework). How did you figure out what to do first? What would you do differently now after learning about assessing situations logically?
- **Prioritizing in a Crisis** Imagine you're juggling school, sports, and family responsibilities, and everything feels urgent. How can the idea of prioritizing actions in a crisis help you manage everyday stress? Give a specific example.
- **Building Confidence** How do you think practicing through role-playing or hearing real teen stories could make you feel more ready for an emergency? What's one way you'd like to practice building confidence this month?

Part 2: Scenario-Based Activity

Read the scenario below and answer the questions to practice your problem-solving mindset and prioritization skills.

Scenario: School Field Trip Chaos You're on a school field trip at a local park when a sudden thunderstorm rolls in. Lightning strikes nearby, the group scatters in panic, and your best friend twists their ankle while running for cover. Your teacher is trying to round everyone up under a sheltered picnic area 50 feet away, but some students are still near the open field. You have a phone with signal, a small first aid kit in your backpack, and a water bottle.

- **Assess the Situation (2-3 sentences):** What's the immediate danger in this scenario? What resources do you have to help? What's the safest next step?
- **Prioritize Actions (List 3 steps in order):** Write down the first three actions you'd take, in order of importance, to handle this crisis. Explain briefly why each step comes in that order.
 - Step 1: _____ Why: _____
 - Step 2: _____ Why: _____

-
- Step 3: _____ Why: _____
-

Part 3: Interactive Challenge – “Mini Crisis Quest”

This hands-on activity builds confidence through simulation. Do this with a friend, sibling, or family member if possible, or plan it out solo and reflect.

Task: Create and Run a Mini Crisis Quest

- **Step 1: Set Up a Scenario** – Pick a pretend emergency for your home or school (e.g., “power outage during a storm” or “small kitchen fire”). Write down the scenario in 1-2 sentences.
- **Step 2: Assign Roles** – Decide who plays what role (e.g., leader, “injured” person, helper). If solo, imagine the roles. List the roles here.
- **Step 3: Add Obstacles** – Include 2-3 fun challenges to solve (e.g., “crawl under a table as smoke” or “find a flashlight in the dark”). Write them down.
 - _____
 - _____
 - _____
- **Step 4: Run It!** – Act out the scenario for 5-10 minutes, timing how fast you “solve” it. If solo, walk through the steps and note your plan. Plan/Notes: _____
- **Reflection (2-3 sentences):** After completing the quest, write what felt easy or hard. How did this make you feel more confident for a real emergency?

Part 4: Resilience Action Plan

Building long-term resilience means preparation and a proactive attitude. Use this section to create a personal plan to stay crisis-ready.

- **Continuous Learning Goal (1 skill):** Pick one safety or emergency skill you want to learn more about in the next month (e.g., basic CPR, reading weather alerts, packing a go-bag). Write it down and list one way you’ll start (e.g., watch a video, ask a parent, join a club). Skill: _____ How I’ll start: _____
- **Proactive Safety Step (1 action):** Choose one small action to make your home, school, or friend group safer this week (e.g., check smoke alarm batteries, share a safety tip with friends, map an evacuation route). Describe what you’ll do and who you’ll involve. Action: _____ Who I’ll involve: _____
- **Motivation Check (1-2 sentences):** Why do you think being proactive and prepared matters for you as a teen? How can it help beyond just emergencies?

Part 5: Quick Self-Assessment

Rate yourself on a scale of 1-5 (1 = Not Confident, 5 = Super Confident) for each skill below after completing this worksheet. Circle your score and jot a quick note on how you can improve if needed.

- **Problem-Solving Mindset:** 1 2 3 4 5 Note: _____
- **Confidence in Emergencies:** 1 2 3 4 5 Note: _____
- **Long-Term Resilience:** 1 2 3 4 5 Note: _____

Wrap-Up Note: Awesome job working through this Chapter 9 worksheet! You’ve reflected on key ideas, tackled a realistic scenario, tried a fun simulation, and made a plan to keep growing. Keep this worksheet handy to track

your progress, and share your favourite part (like the Mini Crisis Quest) with a friend or family member to spread the resilience vibe. You're on your way to becoming a crisis-ready legend—keep it up!
