

Chapter 4

MCQs

Question 1

What is malware, and how does it typically infiltrate a device?

- ☐ A) A type of hardware that boosts internet speed; installed through official stores
- ☒ B) Malicious software designed to harm devices; often enters through sketchy links or downloads
- ☐ C) A secure app for protecting passwords; installed by default on all devices
- ☐ D) A digital currency used by hackers; transferred through online payments

Correct Answer: B)

Malicious software designed to harm devices; often enters through sketchy links or downloads

Question 2

What makes ransomware particularly dangerous for teens?

- ☐ A) It speeds up your device but deletes unimportant files
- ☒ B) It locks your device or files and demands payment to unlock them, risking data loss
- ☐ C) It improves gaming performance but requires a subscription
- ☐ D) It automatically updates apps without user permission

Correct Answer: B)

It locks your device or files and demands payment to unlock them, risking data loss

Question 3

How can you identify a potential phishing attempt in a message or email?

- ☐ A) It comes from a verified account with a blue checkmark and no links
- ☐ B) It uses urgent language like "Act now!" and has suspicious links or typos
- ☐ C) It offers a free subscription to a trusted app with clear instructions
- ☐ D) It includes a personal greeting from someone you know without any requests

Correct Answer: B)

It uses urgent language like "Act now!" and has suspicious links or typos

Question 4

Which of the following is an example of cyberbullying?

- ☐ A) A friend sending you a funny meme in a private chat
- ☐ B) Someone repeatedly posting mean comments about you on social media for others to see
- ☐ C) A classmate asking for help with homework in a group chat
- ☐ D) An app notification reminding you to update your profile picture

Correct Answer: B)

Someone repeatedly posting mean comments about you on social media for others to see

Question 5

What is a recommended step to take if you're experiencing online harassment or cyberbullying?

- ☐ A) Respond with insults to defend yourself and show strength
- ☐ B) Delete all your social media accounts immediately without telling anyone
- ☐ C) Save evidence like screenshots, block the person, and tell a trusted adult
- ☐ D) Ignore the messages completely and hope they stop on their own

Correct Answer: C)

Save evidence like screenshots, block the person, and tell a trusted adult

Question 6

How can you verify if a viral social media post is fake news or misinformation?

- A) Share it immediately to see if others agree it's true
- B) Check the source, cross-check with trusted news outlets, and use fact-checking sites
- C) Trust the post if it has a lot of likes and comments
- D) Assume it's real if it matches your personal opinions

Correct Answer: B)

Check the source, cross-check with trusted news outlets, and use fact-checking sites
