

Chapter 3

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 3: Organizing and Representing Data

Instructions: Complete the following activities to apply what you've learned in Chapter 3. Use a notebook, paper, or digital tools like Google Sheets if available. Be prepared to share your work with your classmates or teacher. Let's dive into the world of data!

Part 1: Organizing Data (15 Minutes)

Activity: Create a Table from Raw Data You've surveyed 6 friends about how many hours they spend on social media each day. The raw data is below:

- Priya: 2 hours
- Rohan: 1.5 hours
- Aisha: 3 hours
- Karan: 0.5 hours
- Sneha: 2.5 hours
- Amit: 1 hour

Task:

- Organize this data into a table with two columns: "Name" and "Hours on Social Media."
- Sort the data manually (or using a spreadsheet if available) from highest to lowest hours.
- Answer: Who spends the most time on social media? Who spends the least?

Space for Table and Answers: (Draw or write your table here or attach a digital screenshot if using a tool.)

- Most time: _____
- Least time: _____

Part 2: Visualizing Data (20 Minutes)

Activity: Choose and Create a Chart Using the social media data from Part 1, decide how to visualize it to show who spends the most time on social media at a glance.

Task:

- Pick a chart type (Bar Chart, Pie Chart, or Line Chart) that best fits this data. Write why you chose it.
 - Chosen Chart Type: _____
 - Reason: _____
- Draw the chart by hand on graph paper or use a digital tool like Google Sheets or Canva to create it. (If using

a digital tool, attach a screenshot or printout.)

- Answer: What does your chart reveal about the data? Write 1-2 sentences.
 - Insight: _____

Space for Chart: (Draw your chart here or attach it separately.)

Part 3: Sorting and Filtering Practice (10 Minutes)

Activity: Analyze a Class Survey Imagine you have a spreadsheet with data about your class's favorite fruits:

Name	Favorite Fruit	Number of Times Eaten per Week
Maya	Apple	5
Arjun	Banana	2
Tara	Mango	4
Sam	Apple	3
Riya	Mango	6

Name

Favorite Fruit

Number of Times Eaten per Week

Maya

Apple

5

Arjun

Banana

2

Tara

Mango

4

Sam

Apple

3

Riya

Mango

6

Task:

- If you sort the data by "Number of Times Eaten per Week" from highest to lowest, who would be at the top?

- Answer: _____
- If you filter the data to show only students who eat their favorite fruit more than 3 times per week, whose names would appear?
 - Answer: _____
- Why is sorting or filtering useful for analyzing data like this? Write 1 sentence.
 - Answer: _____

Part 4: Reflection and Real-Life Application (15 Minutes)

Activity: Data in Your Life Think about data you encounter or could collect in your daily life (e.g., time spent on homework, favourite snacks in your family, or steps walked each day).

- Write down one type of data you'd like to organize and visualize.
 - Data Topic: _____
- How would you organize it (e.g., in a table)? Describe briefly.
 - Method: _____
- What type of chart would you use to visualize it, and why?
 - Chart Type: _____
 - Reason: _____
