

Chapter 8

MCQs

Question 1

What is the first step in using Design Thinking to address school challenges like study habits or bullying?

- ☐ A) Brainstorming solutions without understanding the issue.
 - ☐ B) Observing your day and talking to others to spot problems.
 - ☐ C) Ignoring small issues to focus only on big problems.
 - ☐ D) Waiting for teachers to point out challenges.
- Answer: B

Note: No correct answer specified for this question

Question 2

Which stage of Design Thinking involves creating a small, testable version of your solution for a classroom problem?

- ☐ A) Empathize
 - ☐ B) Define
 - ☐ C) Ideate
 - ☐ D) Prototype
- Answer: D

Note: No correct answer specified for this question

Question 3

What is a key reason to apply Design Thinking to extracurricular challenges, such as low attendance at club events?

- ☐ A) To make clubs more competitive with other schools.
 - ☐ B) To make activities more enjoyable and engaging for members.
 - ☐ C) To reduce the number of clubs offered at school.
 - ☐ D) To focus only on sports teams instead of other activities.
- Answer: B

Note: No correct answer specified for this question

Question 4

Why is it important to involve teachers and peers as stakeholders in your Design Thinking process for school challenges?

- ☐ A) They can provide support, input, and help make your ideas happen.
 - ☐ B) They will always agree with every idea you have.
 - ☐ C) They are not affected by the problems you're trying to solve.
 - ☐ D) They should solve the problems instead of students.
- Answer: A

Note: No correct answer specified for this question

Question 5

What is an effective way to start a presentation of your Design Thinking solution to classmates or teachers?

- ☐ A) Talk only about your personal opinion on the solution.
 - ☐ B) Explain the problem clearly to show why a solution is needed.
 - ☐ C) Avoid mentioning any challenges to keep the audience happy.
 - ☐ D) Focus only on the feedback you expect to receive.
- Answer: B

Note: No correct answer specified for this question

Question 6

How does using Design Thinking to solve school challenges benefit high school students beyond the classroom?

- ☐ A) It limits creativity by focusing only on school problems.
 - ☒ B) It teaches problem-solving and teamwork skills useful for college and jobs.
 - ☐ C) It makes school more stressful by adding extra work.
 - ☐ D) It only helps teachers and not students.
- Answer: B

Note: No correct answer specified for this question
