

Chapter 9

MCQs

Question 1

What does "scaling up" mean in the context of Design Thinking for community and global issues?

- ☐ A) Focusing only on personal problems like study stress.
 - ☐ B) Applying Design Thinking to larger issues that affect more people beyond your immediate circle.
 - ☐ C) Ignoring community problems to focus on global challenges.
 - ☐ D) Solving problems without using the Design Thinking stages.
- Answer: B

Note: No correct answer specified for this question

Question 2

What is a key step in identifying local community needs using Design Thinking?

- ☐ A) Avoiding conversations with community members to save time.
 - ☐ B) Observing your surroundings and empathizing with residents about issues like accessibility or the environment.
 - ☐ C) Focusing only on global issues instead of local ones.
 - ☐ D) Waiting for someone else to point out community problems.
- Answer: B

Note: No correct answer specified for this question

Question 3

How can high school students connect global issues like sustainability to their local area using Design Thinking?

- ☐ A) By ignoring local problems and focusing only on worldwide challenges.
- ☐ B) By identifying how a global issue, like plastic waste, shows up locally and taking small actions to address it.
- ☐ C) By assuming global issues don't affect their community.
- ☐ D) By waiting for adults to solve global problems. Answer: B

Note: No correct answer specified for this question

Question 4

Why is partnering with community members important when using Design Thinking for community issues?

- ☐ A) They can provide valuable insights, resources, and support to strengthen your solutions.
- ☐ B) They will solve the problem for you without any input.
- ☐ C) They are not affected by the issues you're trying to address.
- ☐ D) They always disagree with student ideas. Answer: A

Note: No correct answer specified for this question

Question 5

What is a strategy for designing solutions with limited resources using Design Thinking?

- ☐ A) Waiting for a large budget before starting any project.
- ☐ B) Focusing on low-cost ideas and leveraging people power or available resources to create impact.
- ☐ C) Avoiding testing small versions of your idea to save time.
- ☐ D) Ignoring partnerships to work alone on solutions. Answer: B

Note: No correct answer specified for this question

Question 6

How does applying Design Thinking to community and global issues benefit high school students?

- A) It limits their focus to only personal challenges.
 - B) It builds skills like problem-solving, teamwork, and creativity for college, careers, and life.
 - C) It makes community issues more complicated to solve.
 - D) It discourages students from thinking about global challenges.
- Answer: B

Note: No correct answer specified for this question
