

Chapter 4

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet: Chapter 4 - Fundamentals of Video Creation

Course: Digital Content Creation & Storytelling Skills for High Schoolers **Objective:** Apply the core concepts of video creation from Chapter 4 to develop practical skills in planning, shooting, and presenting engaging video content for social media or school projects.

Part 1: Quick Recall (Answer in 1-2 sentences)

- **Equipment Basics:** What's one advantage of using a smartphone over a DSLR camera for video creation? How does this help you as a teen creator?
- **Audio Importance:** Why is clear audio crucial for videos, and what's one budget-friendly way to improve sound quality?

Part 2: Planning Practice

- **Storyboard Your Idea:** Pick a simple video concept (e.g., "My After-School Routine" for TikTok or "A Funny School Skit" for Instagram Reels). Sketch or describe a 3-scene storyboard below. Include what's happening, the location, and any props or text overlays for each scene.
 - **Scene 1:**
 - **Scene 2:**
 - **Scene 3:**
- **Script Writing:** Using the same video idea from above, write a short script with an opener, one main point or action, and a call-to-action ending. Keep it short (under 60 seconds for short-form content).
 - **Opener (Grab Attention):**
 - **Main Point/Action:**
 - **Ending (Call-to-Action):**

Part 3: Hands-On Challenges

- **Shooting Techniques Experiment:** Film a 20-30 second video clip (e.g., "Showing Off My Favorite Sneakers" or "A Quick Room Tour") using your phone. Try at least two different angles or framing techniques from Chapter 4 (e.g., low angle, close-up shot). Describe what you did and how it changed the vibe of the video.
 - **Technique 1 (e.g., Low Angle):** What did you film, and how did it look?
 - **Technique 2 (e.g., Close-Up Shot):** What did you film, and what effect did it have?
- **Bonus:** Post the clip on TikTok or Instagram Stories with a caption like "Trying new angles—thoughts? " and tag a friend to try it too.

- **Audio Test:** Record two short 10-15 second clips of yourself talking about something random (e.g., “Why I Love Fridays”). Use different audio setups for each:
 - Clip 1: Record in a quiet space using just your phone mic.
 - Clip 2: Record in the same space using earbuds with a built-in mic or any external mic if you have one. If outside, try a wind-blocking hack like a sock. Play both back and describe the difference in sound quality.
 - Clip 1 (Phone Mic): How clear was the audio? Any background noise?
 - Clip 2 (Earbuds/External Mic): Did the sound improve? Why or why not?
- **Bonus:** Share the better clip on social media with “Testing my audio game—how’s it sound? .”

Part 4: On-Camera Presence Practice

- **Confidence Builder:** Record a 15-second “Shoutout to My Favorite App/Game” clip for Instagram Stories or TikTok. Focus on looking at the camera lens, speaking clearly, and showing energy (e.g., smile, use gestures). Watch it back and answer:
 - What did you do well (e.g., eye contact, energy)?
 - What could you improve (e.g., speaking louder, less fidgeting)?
- **Bonus:** Post it with “Obsessed with this—what’s your fave? ” and ask followers for feedback on your vibe.
- **Engage Your Audience:** Plan a short video idea (e.g., “Top 3 School Snacks”) where you connect with viewers. Write down one question you’ll ask them on camera and one way you’ll show your personality (e.g., a funny reaction or slang).
 - Question for Viewers:
 - Personality Element (How will you make it “you”?):
- **Bonus:** Film and post it with a trending hashtag like #SchoolSnacks and see how many comments or replies you get!

Part 5: Reflection

- **What’s Your Takeaway?** What’s one video creation skill or tip from this chapter (e.g., storyboarding, a shooting angle, audio hack, or confidence trick) that you’re most excited to use in your next video? Why do you think it’ll level up your content?
