- ☐ D) iMovie (only for Windows users)

Correct Answer: C)

CapCut

Question 2

What is the main purpose of trimming a video clip during editing?

- ☐ A) To remove an entire section from the middle of the clip
- ☐ B) To shorten a clip by adjusting its start or end points for better pacing
- ☐ C) To add special effects between two clips
- ☐ D) To overlay text or graphics on the video

Correct Answer: B)

To shorten a clip by adjusting its start or end points for better pacing

Question 3

Why is Colour grading used in video editing, and how can it impact your content?

- ☐ A) It fixes audio issues to make voices clearer
- ☐ B) It adjusts brightness and contrast to correct lighting mistakes
- ☐ C) It stylizes the video with specific Colour tones to create a mood or cinematic look
- ☐ D) It adds text and graphics for better storytelling

Correct Answer: C)

It stylizes the video with specific Colour tones to create a mood or cinematic look

Question 4

When adding audio to a video, what should you consider to avoid copyright issues on platforms like YouTube or TikTok?

- ☐ A) Use any popular song as long as it's trending
- ☐ B) Always add your own recorded music without checking platform rules
- ☐ C) Choose royalty-free music from app libraries or use platform-approved sounds
- ☐ D) Keep the music volume high to cover any copyright claims

Correct Answer: C)

Choose royalty-free music from app libraries or use platform-approved sounds
