

Chapter 5

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 5: Video Editing for Engaging Content

Objective: To reinforce key concepts from Chapter 5 through practical activities, reflection, and critical thinking exercises related to video editing skills.

Part 1: Key Concepts Review (Short Answer)

Answer the following questions based on what you learned in Chapter 5. Keep your answers concise but thoughtful.

- What is the difference between cutting and trimming a video clip? Why are both important for creating engaging content?
- Name two reasons why adding text or graphics to a video can improve its impact on social media platforms like TikTok or Instagram.
- Explain the difference between color correction and color grading. How can each affect the mood or quality of your video?
- Why is it important to use royalty-free music or platform-approved sounds when editing videos for YouTube or TikTok?
- What aspect ratio should you use when exporting a video for Instagram Reels, and why does this matter for viewer engagement?

Part 2: Practical Activity - Mini Editing Challenge

Objective: Apply basic video editing skills using a smartphone or computer with free software like CapCut or iMovie.

Instructions:

- Film a short 30-60 second video on your phone or use an existing clip (e.g., a funny moment, a quick tutorial, or a day-in-the-life snippet).
- Edit the video using at least **three techniques** from Chapter 5. Check the boxes below for the techniques you will use:
 - Cutting or Trimming (remove unnecessary parts for better pacing)
 - Transitions (add a smooth effect between clips)
 - Text/Graphics (add captions, stickers, or emojis for emphasis)
 - Color Correction/Grading (adjust brightness or add a mood filter)
 - Audio Editing (add background music, voiceover, or sound effects)

- Export the video for a specific platform (e.g., TikTok, Instagram Reels, or YouTube) using the correct aspect ratio (refer to Chapter 5, Section 6).
- Save or upload the video and answer the reflection questions below.

Reflection Questions:

- Which platform did you export your video for, and what settings did you use (e.g., aspect ratio, resolution)?
- What was the hardest part of editing this video, and how did you overcome it?
- How did the techniques you chose (e.g., text, music) make your video more engaging?

Optional Sharing: If comfortable, share your edited video on social media with the hashtag #TeenEditStar and tag a classmate to challenge them to try this activity!

Part 3: Matching Exercise - Software and Use Cases

Match the video editing software from Chapter 5 to the best use case for a high school student. Draw a line or write the letter next to the number.

- iMovie
- Adobe Premiere Pro
- DaVinci Resolve
- CapCut
- A. Best for quick, trendy edits on a phone for TikTok or Instagram Reels with templates and auto-captions. B. Ideal for Apple users wanting a free, simple tool for school projects or basic YouTube vlogs. C. Great for advanced creators working on cinematic short films or detailed YouTube content with student discounts. D. A free, powerful option for color grading and pro-level edits like gaming montages or nature time-lapses.

Part 4: Creative Thinking - Storyboard to Edit Plan

Objective: Plan a short video project by connecting storytelling with editing techniques.

Instructions: Imagine you're creating a 1-minute video titled "My Epic Weekend Fail" to post on TikTok. Sketch or describe three key scenes in the boxes below (e.g., "Setting up for a cool trick," "The trick fails," "Laughing about it"). Then, write one editing technique from Chapter 5 you'll use for each scene to make it engaging.

Scene #	Description of Scene	Editing Technique & Why
Scene 1		
Scene 2		
Scene 3

Editing Technique & Why

Scene 1

Scene 2

Scene 3

Bonus Question: What mood or vibe do you want your video to have (e.g., funny, dramatic)? How will your color

grading or music choices support this mood?

Part 5: Self-Assessment Checklist

Reflect on your understanding of Chapter 5 by checking the boxes that apply to you. Be honest—this helps you identify areas to improve!

- I can name at least two video editing software options and explain who they're best for (e.g., beginners vs. pros).
- I understand the difference between cutting, trimming, and transitions, and can use them to improve video pacing.
- I know how to add text, graphics, or effects to make my videos more visually appealing.
- I can explain why color correction and grading matter, and I've tried adjusting colors in a video.
- I've added music or sound effects to a video and understand the importance of avoiding copyright issues.
- I can export a video with the correct settings (like aspect ratio) for at least one social media platform.

Reflection: Which area do you feel least confident about, and what will you do to practice or learn more about it?
