

Chapter 7

MCQs

Question 1

According to Section 1, why is cheating with AI considered a bad idea in high school?

- ☐ A) It makes assignments too easy and boring
 - ☐ B) It can lead to failing grades, suspension, and missed learning opportunities
 - ☐ C) It prevents teachers from using AI detection tools
 - ☐ D) It only affects college students, not high schoolers
- Correct Answer: B) It can lead to failing grades, suspension, and missed learning opportunities

Note: No correct answer specified for this question

Question 2

What is the key difference between fair use and plagiarism, as described in Section 2?

- ☐ A) Fair use requires permission for all content, while plagiarism does not
 - ☐ B) Fair use allows limited use of copyrighted material with conditions, while plagiarism is using others' work without credit
 - ☐ C) Fair use applies only to images, while plagiarism applies to text
 - ☐ D) Fair use is illegal, while plagiarism is acceptable in school projects
- Correct Answer: B) Fair use allows limited use of copyrighted material with conditions, while plagiarism is using others' work without credit

Note: No correct answer specified for this question

Question 3

Based on Section 3, what is one way high school students can respect privacy when using digital tools for group projects?

- ☐ A) Share classmates' personal information online to collaborate faster
 - ☐ B) Post group work on public platforms without asking team members
 - ☐ C) Ask permission before sharing content involving others and limit access to shared files
 - ☐ D) Use unsecure apps to store project data for easy access
- Correct Answer: C) Ask permission before sharing content involving others and limit access to shared files

Note: No correct answer specified for this question

Question 4

What does Section 4 highlight as a potential issue with AI tools regarding fairness?

- ☐ A) AI tools are always accurate and unbiased
 - ☐ B) AI can perpetuate biases from training data, like suggesting stereotypical roles
 - ☐ C) AI refuses to provide answers on controversial topics
 - ☐ D) AI only works for certain subjects like math and science
- Correct Answer: B) AI can perpetuate biases from training data, like suggesting stereotypical roles

Note: No correct answer specified for this question

Question 5

In Section 4, why is it important to fact-check AI output for school projects?

- ☐ A) AI always provides correct information without errors
 - ☐ B) AI can “hallucinate” facts or give wrong information confidently
 - ☐ C) AI only works for creative tasks, not factual ones
 - ☐ D) Fact-checking AI is unnecessary if it sounds convincing
- Correct Answer: B) AI can “hallucinate” facts or give wrong information confidently

Note: No correct answer specified for this question

Question 6

What is a key step in creating personal rules for responsible tech use, as discussed in Section 5?

- ☐ A) Rely entirely on school policies without personal reflection
 - ☐ B) Reflect on your values and set practical boundaries for when and how to use AI
 - ☐ C) Use AI for all assignments to save time and effort
 - ☐ D) Avoid using digital tools to prevent ethical dilemmas
- Correct Answer: B) Reflect on your values and set practical boundaries for when and how to use AI

Note: No correct answer specified for this question
