

## Chapter 4

### MCQs

#### Question 1

What is the primary difference between misinformation and disinformation?

- ☐ A) Misinformation is always about politics, while disinformation is about health.
- ☐ B) Misinformation is shared unintentionally, while disinformation is spread deliberately to deceive.
- ☐ C) Misinformation is created by teens, while disinformation is created by adults.
- ☐ D) Misinformation is fake news, while disinformation is a type of meme.

**Correct Answer: B)**

Misinformation is shared unintentionally, while disinformation is spread deliberately to deceive.

#### Question 2

Why are teens particularly vulnerable to misinformation on social media?

- ☐ A) They lack access to fact-checking tools.
- ☐ B) They rely heavily on platforms that prioritize engagement over accuracy and are influenced by peer pressure.
- ☐ C) They are not allowed to use credible news sources.
- ☐ D) They do not understand how the internet works.

**Correct Answer: B)**

They rely heavily on platforms that prioritize engagement over accuracy and are influenced by peer pressure.

### Question 3

Which of the following is a common trick used by creators of fake news to deceive readers?

- ☐ A) Providing detailed sources for every claim.
- ☐ B) Using misleading headlines to grab attention with clickbait phrases.
- ☐ C) Sharing content only in long, detailed articles.
- ☐ D) Avoiding the use of images or videos.

**Correct Answer: B)**

Using misleading headlines to grab attention with clickbait phrases.

### Question 4

What is a practical tool mentioned in the chapter for verifying the authenticity of a suspicious photo?

- ☐ A) Posting the photo on social media to ask friends.
- ☐ B) Using a reverse image search tool like Google Images or TinEye.
- ☐ C) Ignoring the photo if it looks suspicious.
- ☐ D) Editing the photo to see if it changes.

**Correct Answer: B)**

Using a reverse image search tool like Google Images or TinEye.

### Question 5

What is a real-world consequence of sharing health-related misinformation, as discussed in the chapter?

- ☐ A) It can improve public awareness of health issues.
- ☐ B) It can lead to dangerous behaviors, like ingesting harmful substances during a health crisis.
- ☐ C) It only affects online communities and not real life.
- ☐ D) It encourages people to visit doctors more often.

**Correct Answer: B)**

It can lead to dangerous behaviors, like ingesting harmful substances during a health crisis.

### Question 6

What personal risk might a teen face by sharing false information online?

- A) Gaining more followers on social media.
- B) Damaging their reputation or facing legal issues for spreading defamatory content.
- C) Receiving awards for creative content.
- D) Being praised by teachers for online activity.

**Correct Answer: B)**

Damaging their reputation or facing legal issues for spreading defamatory content.
