

Chapter 2

MCQs

Question 1

What is a digital footprint?

- ☐ A) A physical mark left by your device on the internet
- ☒ B) The collection of data and information about you that exists online due to your internet activities
- ☐ C) Only the social media accounts you create
- ☐ D) A temporary record of your online searches that disappears after a day

Correct Answer: B)

The collection of data and information about you that exists online due to your internet activities

Question 2

What is the difference between an active and a passive digital footprint?

- ☐ A) Active is what you delete online, while passive is what you post
- ☒ B) Active is what you choose to share, like posts, while passive is data collected without your direct input, like search history
- ☐ C) Active is only on social media, while passive is only on websites
- ☐ D) Active is private, while passive is public

Correct Answer: B)

Active is what you choose to share, like posts, while passive is data collected without your direct input, like search history

Question 3

How can your online actions leave a trace in your digital footprint?

- ☐ A) Only through posts you share on social media
- ☒ B) Through likes, comments, searches, location data, and tagged content, even if you delete them later
- ☐ C) Only if you use public Wi-Fi to access the internet
- ☐ D) Only if you give permission for websites to track you

Correct Answer: B)

Through likes, comments, searches, location data, and tagged content, even if you delete them later

Question 4

Why is assessing your current digital footprint important for teens?

- ☐ A) It helps you get more followers on social media
- ☒ B) It lets you see what's online about you and if it matches the personal brand you want to build
- ☐ C) It guarantees that nothing bad will ever show up online
- ☐ D) It's only necessary if you're applying for a job right now

Correct Answer: B)

It lets you see what's online about you and if it matches the personal brand you want to build
