

Chapter 2

MCQs

Question 1

What is the role of curiosity in developing a research mindset as described in the chapter?

- ☐ A) To accept information without questioning it
- ☐ B) To spark interest and ask specific, actionable questions that guide investigation
- ☐ C) To focus only on topics already known to you
- ☐ D) To avoid digging deeper into complex issues

Correct Answer: B)

To spark interest and ask specific, actionable questions that guide investigation

Question 2

How does critical thinking help in research according to the chapter?

- ☐ A) By encouraging you to believe every claim you read online
- ☐ B) By helping you question information, analyze its credibility, and decide if it's trustworthy
- ☐ C) By limiting your research to only one source of information
- ☐ D) By ignoring data that doesn't match your opinion

Correct Answer: B)

By helping you question information, analyze its credibility, and decide if it's trustworthy

Question 3

Which of the following is a characteristic of a reliable source as mentioned in the chapter?

- ☐ A) It comes from a random blog with no author or evidence
- ☒ B) It is backed by evidence and comes from credible organizations like government or educational websites
- ☐ C) It is full of advertisements and clickbait headlines
- ☐ D) It provides outdated information without any references

Correct Answer: B)

It is backed by evidence and comes from credible organizations like government or educational websites

Question 4

What is the purpose of setting research goals and objectives in the research process?

- ☐ A) To make research more confusing and time-consuming
- ☒ B) To provide a clear roadmap with a big-picture goal and specific steps to stay focused
- ☐ C) To avoid planning and randomly collect information
- ☐ D) To focus only on small details without a larger purpose

Correct Answer: B)

To provide a clear roadmap with a big-picture goal and specific steps to stay focused
