

Chapter 3

MCQs

Question 1

What is a key advantage of using databases like JSTOR for research, as discussed in the chapter?

- ☐ A) They provide free entertainment videos and memes
- ☒ B) They offer access to peer-reviewed studies and articles, often through school subscriptions
- ☐ C) They focus only on outdated information from the past decade
- ☐ D) They are mainly used for finding random blog posts

Correct Answer: B)

They offer access to peer-reviewed studies and articles, often through school subscriptions

Question 2

How can advanced search techniques on search engines help with research, according to the chapter?

- ☐ A) By increasing the number of irrelevant results to scroll through
- ☒ B) By using tools like quotation marks and "site:" to find specific, relevant information faster
- ☐ C) By limiting searches to only paid advertisements
- ☐ D) By automatically downloading unrelated apps

Correct Answer: B)

By using tools like quotation marks and "site:" to find specific, relevant information faster

Question 3

What is a sign of bias in a source when evaluating information, as mentioned in the chapter?

- ☐ A) The source uses neutral language and presents multiple perspectives
- ☐ B) The source includes data and citations from credible studies
- ☒ C) The source pushes a single viewpoint with loaded words like “horrible” without evidence
- ☐ D) The source is published on a government or educational website

Correct Answer: C)

The source pushes a single viewpoint with loaded words like “horrible” without evidence

Question 4

Why is cross-referencing important in the research process, based on the chapter’s explanation?

- ☐ A) It ensures you only use one source for all your information
- ☒ B) It helps confirm the accuracy of information by comparing it across multiple reliable sources
- ☐ C) It focuses on finding the most biased sources to balance opinions
- ☐ D) It guarantees that all sources will disagree with each other

Correct Answer: B)

It helps confirm the accuracy of information by comparing it across multiple reliable sources
