

Chapter 11

MCQs

Question 1

What is the primary purpose of "game mechanics" in game design?

- ☐ A) To create the background music for the game
- ☐ B) To define the rules and systems that make the game function
- ☐ C) To design the visual art and characters
- ☐ D) To write the storyline of the game

Correct Answer: B)

To define the rules and systems that make the game function

Question 2

Which of the following is a key difference between 2D and 3D game development?

- ☐ A) 2D games always have better graphics than 3D games
- ☐ B) 3D games include depth and allow movement in all directions, while 2D games are flat
- ☐ C) 2D games require more powerful computers than 3D games
- ☐ D) 3D games cannot be made with free tools like Unity

Correct Answer: B)

3D games include depth and allow movement in all directions, while 2D games are flat

Question 3

How does Augmented Reality (AR) differ from Virtual Reality (VR)?

- ☐ A) AR fully immerses you in a digital world with a headset, while VR uses a phone screen
- ☐ B) AR overlays digital elements onto the real world, while VR creates a completely virtual environment
- ☐ C) VR is only used for gaming, while AR is only for education
- ☐ D) AR requires no technology, while VR needs expensive equipment

Correct Answer: B)

AR overlays digital elements onto the real world, while VR creates a completely virtual environment

Question 4

What is a key advantage of using Scratch for beginner game developers?

- ☐ A) It requires advanced coding knowledge in C#
- ☐ B) It allows for drag-and-drop coding without typing complex code
- ☐ C) It is only used for creating 3D games and VR experiences
- ☐ D) It is a paid tool with professional-grade features

Correct Answer: B)

It allows for drag-and-drop coding without typing complex code

Question 5

When designing a simple game as part of a hands-on activity, what is an important step to ensure the game is playable?

- ☐ A) Focus only on creating detailed graphics before testing
- ☐ B) Test and tweak the game to balance difficulty and fix bugs
- ☐ C) Make the game as complex as possible to impress others
- ☐ D) Avoid sharing the game with peers for feedback

Correct Answer: B)

Test and tweak the game to balance difficulty and fix bugs
