

Chapter 12

MCQ Questions

Question 1

Exploring STEM Education Pathways What is a primary benefit of taking AP or IB STEM courses in high school?

- ☐ A) They guarantee admission to top colleges.
- ☐ B) They provide an opportunity to earn college credit and prepare for advanced studies.
- ☐ C) They are easier than regular high school courses.
- ☐ D) They focus only on theoretical knowledge without practical skills.

Correct Answer: B)

They provide an opportunity to earn college credit and prepare for advanced studies.

Question 2

Skills for Success Which skill is most essential when working on a group STEM project, such as building a robot for a competition?

- ☐ A) Working alone to ensure perfection.
- ☐ B) Teamwork to collaborate and combine diverse skills like coding and design.
- ☐ C) Avoiding communication to prevent conflicts.
- ☐ D) Focusing only on personal tasks without considering others' contributions.

Correct Answer: B)

Teamwork to collaborate and combine diverse skills like coding and design.

Question 3

Building a STEM Portfolio What is a key purpose of including a “failures” section in a STEM portfolio?

- ☐ A) To show that you give up easily when projects don't work.
- ☐ B) To demonstrate grit and growth by explaining lessons learned from challenges.
- ☐ C) To prove that STEM is too difficult for most students.
- ☐ D) To avoid showcasing successful projects.

Correct Answer: B)

To demonstrate grit and growth by explaining lessons learned from challenges.

Question 4

Inspiring Stories What lesson can high school students learn from teen innovator Gitanjali Rao, who created a device to detect lead in water?

- ☐ A) STEM achievements are only possible for adults with advanced degrees.
- ☐ B) High school projects are unimportant and cannot make a real impact.
- ☐ C) Age is no barrier to innovation, and small projects can address big problems.
- ☐ D) STEM should only focus on theoretical research, not practical solutions.

Correct Answer: C)

Age is no barrier to innovation, and small projects can address big problems.

Question 5

Final Project - Proposing a STEM Solution What is a critical first step in proposing a STEM solution for a real-world problem?

- ☐ A) Immediately building a prototype without planning.
- ☐ B) Identifying a specific problem in your community or the world that you care about.
- ☐ C) Copying an existing solution without research.
- ☐ D) Focusing only on global issues that are impossible to solve locally.

Correct Answer: B)

Identifying a specific problem in your community or the world that you care about.
