

Chapter 12

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet: Chapter 12 - Preparing for a Future in STEM

Hey, future STEM stars! This worksheet is your quick, fun guide to reflect on Chapter 12 and apply what you've learned about STEM pathways, skills, portfolios, inspiration, and problem-solving. Complete these activities to level up your journey—let's make the future awesome together! Takes about 20-30 minutes.

Part 1: Quick Reflection (5 minutes)

Answer these short questions to recap key ideas from the chapter. Be honest—there's no wrong answer!

- **STEM Pathway Dream:** What's one STEM career or college major you're curious about after reading Section 1? (e.g., robotics, biology)
○
- **Skill Check:** Which soft skill (teamwork, communication, problem-solving) do you want to improve most, and why? (Section 2)
○
- **Inspiration Spark:** Name one STEM innovator from Section 4 who inspired you. What's one cool thing about their story?
○

Part 2: Mini Portfolio Kickstart (10 minutes)

Let's start building your STEM portfolio (Section 3)! Pick one small project or activity you've done (like a science experiment, coding game, or DIY build). Answer below to document it like a pro.

- **Project Name:** _____
- **What I Did:** Describe it in 2 sentences. (e.g., "I coded a simple game in Scratch. It had a player avoiding obstacles.")
○
○
- **What I Learned:** One skill or lesson from this project. (e.g., "I learned loops in coding.")
○
- **Fun Add-On:** If you could add a meme or funny title to this project for your portfolio, what would it be? (e.g., "Obstacle Chaos LOL")
○

Next Step: Take a photo or screenshot of this project (if possible) and save it for your digital portfolio on Google

Sites or GitHub!

Part 3: STEM Solution Brainstorm Blast (10 minutes)

Time to think like an innovator (Section 5)! Identify a real-world problem you care about and brainstorm a quick STEM idea to solve it.

- **Problem:** What's one issue in your school, community, or world? (e.g., too much plastic waste)
 -
- **STEM Solution Idea:** How could science, tech, engineering, or math help? (e.g., "Design a cheap recycling app to track plastic use.")
 -
- **Who It Helps:** Who benefits from this solution? (e.g., students, local families)
 -
- **Catchy Slogan:** Create a fun tagline for your idea to pitch it! (e.g., "Trash It with Tech!")
 -

Bonus Challenge: Sketch your idea on the back of this sheet or a separate paper (like a device, app screen, or flowchart). Share it with a friend for feedback!

Part 4: Fun Wrap-Up Challenge (5 minutes)

Pick ONE of these quick, creative tasks to celebrate your STEM vibe. Share with #MySTEMStart if you can!

- **Option 1 - Meme Magic:** Draw or describe a meme about your STEM journey (e.g., "Me debugging code at midnight" with a tired cat).
 - Description/Drawing Idea: _____
- **Option 2 - STEM Squad Shoutout:** Write a 1-sentence thank you to a classmate, teacher, or family member who's helped you with STEM.
 - Shoutout: _____
- **Option 3 - Future Vision:** In 5 years, where do you see yourself in STEM? (e.g., "Coding apps at a startup!")
 - Vision: _____
