

Chapter 3

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet: Green Skills Challenge for a Sustainable Lifestyle

Complete these activities, share your ideas with friends, and let's make a greener India together! Don't forget to hashtag #GreenTeenIndia on social media if you post your work.

Part 1: Upcycling and DIY Projects – Turn Trash into Treasure!

Activity 1: Design Your Own Upcycled Item (Creative Thinking) Think of one item in your home that's about to be thrown away (like an old kurta, tin can, or broken diya). Sketch or describe how you can upcycle it into something useful or decorative with a desi twist.

- Item Chosen: _____
- What will you turn it into? (e.g., kurta into a tote bag with block print design)
- Materials Needed: (e.g., scissors, glue, paint)
- Why is this upcycling idea sustainable?

Mini-Challenge: Try making this item over the weekend and bring a photo or the actual item to class for a show-and-tell. Bonus points for the most creative or useful design!

Part 2: Gardening and Urban Farming – Grow Your Green Thumb!

Activity 2: Plan Your Mini Indian Garden (Practical Planning) Imagine you have a small space like a balcony, terrace, or windowsill. Plan a mini garden to grow herbs or veggies commonly used in Indian cooking (like dhaniya, pudina, or bhindi). Answer the following:

- **Space Available:** (e.g., windowsill in my room)
- **What will you grow?** (Pick 1-2 plants)
- **Containers to Use:** (e.g., old chai cups, paint buckets)
- **How will you care for it?** (e.g., water every morning, ensure sunlight)
- **Fun Fact:** How will you use your harvest in a desi dish? (e.g., pudina for chutney)

Mini-Challenge: Start your mini garden this week! Track its progress for a month and share updates with your class or on social media with #DesiGrowOff. Who can grow the healthiest plant?

Activity 3: Composting Quick Quiz (Critical Thinking) Answer the following questions about composting, a key part of sustainable gardening:

- Name two kitchen scraps you can compost in an Indian household.
- Why should you avoid putting oily food or meat in a compost bin?
- How does composting help reduce waste in crowded Indian cities?

Part 3: Eco-Friendly Technology Use – Be a Tech-Savvy Eco-Hero!

Activity 4: E-Waste Action Plan (Problem Solving) E-waste is a growing problem in India. Think about old gadgets in your home (like a broken phone or charger) and create an action plan to handle them responsibly.

- **Gadget Identified:** (e.g., old Nokia phone)
- **Condition:** (Working or broken?)
- **What will you do with it?** (e.g., donate to an NGO like Goonj if working, or find an e-waste drop-off point if broken)
- **Where can you take it?** (e.g., local store like Croma, school e-waste drive)
- **How can you spread awareness?** (e.g., tell family via WhatsApp group)

Mini-Challenge: Research one e-waste collection point near your home or school (check online or ask around). Write down the location or contact details here:

Activity 5: Tech Detox Tracker (Self-Reflection) For 3 days, track your device usage and try reducing it by 1 hour each day to save energy (important in India with frequent power cuts!). Also, note one eco-friendly app you learned about in the chapter (like Ecosia or JouleBug).

- **Day 1:** Hours on devices: ____ | Reduced by: ____ hour(s)
- **Day 2:** Hours on devices: ____ | Reduced by: ____ hour(s)
- **Day 3:** Hours on devices: ____ | Reduced by: ____ hour(s)
- **Eco-App Chosen:** _____
- **How will you use this app to be more sustainable?** (e.g., plant trees with searches on Ecosia)

Part 4: Green Skills Reflection – Be the Change!

Activity 6: My Sustainability Pledge (Personal Commitment) After completing this worksheet and reading Chapter 3, pick ONE green skill you're most excited to try (upcycling, gardening, or eco-tech use). Write a short pledge on how you'll start and why it matters to you and your community in India.

- **Green Skill Chosen:** _____
- **My Pledge:** (e.g., I pledge to start composting kitchen waste to reduce landfill trash in my city because I want cleaner streets.)

Group Discussion Prompt: Share your pledge with a classmate or in a group. How can you support each other in keeping these promises? Jot down one idea:

Bonus Fun Challenge: Green Teen India Campaign!

Create a catchy slogan or poster idea for a social media campaign to inspire other Indian teens to adopt green skills. It could be about upcycling Diwali waste, growing tulsi at home, or reducing e-waste. Write or sketch your idea below:

- **Slogan:** (e.g., "Upcycle Diwali, Light Up Sustainability!")
- **Poster Idea:** (Describe or sketch—e.g., a drawing of a diya made from waste with the slogan)
