

Chapter 7

MCQs

Question 1

Which of the following is an example of a renewable energy source that harnesses natural elements to generate power?

- A) Coal-powered plants
- B) Wind turbines
- C) Gasoline engines
- D) Nuclear reactorsCorrect Answer:B) Wind turbines

Note: No correct answer specified for this question

Question 2

What is a common economic barrier to adopting sustainable practices on a large scale?

- A) Lack of public interest in green technologies
- B) High upfront costs of installing solutions like solar panels
- C) Too many renewable energy options available
- D) Overproduction of eco-friendly productsCorrect Answer:B) High upfront costs of installing solutions like solar panels

Note: No correct answer specified for this question

Question 3

Why is it challenging to balance development with environmental protection in growing cities?

- ☐ A) Development always leads to cleaner air and water
 - ☐ B) Building infrastructure often harms natural habitats or increases pollution
 - ☐ C) Environmental protection laws are too easy to enforce
 - ☐ D) Cities have unlimited resources to protect the environment
- Correct Answer: B) Building infrastructure often harms natural habitats or increases pollution

Note: No correct answer specified for this question

Question 4

What does “carbon neutrality” mean in the context of a sustainable future?

- ☐ A) Producing more carbon dioxide to balance global temperatures
 - ☐ B) Ensuring no net carbon dioxide emissions by offsetting pollution
 - ☐ C) Completely stopping all industrial activities
 - ☐ D) Ignoring carbon emissions to focus on waste reduction
- Correct Answer: B) Ensuring no net carbon dioxide emissions by offsetting pollution

Note: No correct answer specified for this question
