

Chapter 7

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet: Chapter 7 – Future of Sustainability: Innovations and Challenges

Instructions: Complete all sections of this worksheet. Be creative, thoughtful, and use what you've learned from Chapter 7 to answer the questions and complete the activities. If you need extra space, use the back of this sheet or additional paper.

Part 1: Short-Answer Questions

Answer the following questions in 2-3 sentences. Use examples from the chapter where possible.

- **Emerging Green Technologies** Describe one green technology (like renewable energy or sustainable packaging) that excites you. Why do you think it's important for the future?
- **Challenges in Sustainability** What is one social or economic barrier to sustainability mentioned in the chapter? How might teens help overcome this barrier in their own community?

Part 2: Creative Thinking – “Design Your Green Future”

Imagine you're living in the year 2050, and the world has achieved zero waste and carbon neutrality. Answer the following prompts to create a vision of this sustainable future.

- **Describe Your World:** What does a typical day look like in 2050? Mention at least two green technologies or practices (like electric vehicles or zero-waste systems) that are part of everyday life. (3-5 sentences)
- **Your Role:** As a teen today, what is one action you can take now to help make this 2050 vision a reality? Be specific (e.g., starting a school club, reducing plastic use, etc.).

Part 3: Hands-On Challenge – “Eco-Inventor Idea”

Pretend you're pitching a new green technology on a teen version of “Shark Tank.” In the space below, write a short description (3-5 sentences) of your invention. Include what it does, how it helps the environment, and why teens would love it. (Example: A solar-powered backpack that charges devices while you walk to school.)

My Green Invention:

Optional Bonus: Draw a quick sketch of your invention on the back of this worksheet or a separate paper. Label the key features!

Part 4: Reflection

Answer this question in a short paragraph (4-5 sentences). Be honest and thoughtful. **What's one thing from this chapter that inspired you the most about the future of sustainability? Why did it stand out to you, and how can you use this inspiration in your own life?**
