

Chapter 4

Worksheet

Instructions:

Please complete all activities in this worksheet. Write your answers in the spaces provided or on separate sheets if needed.

Worksheet for Chapter 4: Critical Thinking and Adaptability: Solving Problems in a Changing World

Purpose: To reinforce key concepts from Chapter 4 through a mix of multiple-choice questions, short-answer prompts, and a reflective activity. This worksheet is designed to encourage critical thinking, problem-solving, and personal application of adaptability skills.

Part 1: True/False Questions

Instructions: Read each statement carefully and circle whether it is True or False based on the concepts discussed in Chapter 4.

- Defining the problem clearly is an important first step in the problem-solving process because it helps focus on the real issue. True / False
- Critical thinking means making decisions quickly without considering evidence or facts. True / False
- Asking “What if?” questions can help spark creativity by encouraging exploration of unconventional or hypothetical ideas. True / False

Part 2: Short-Answer Questions

Instructions: Answer the following questions in 2-3 sentences. Use examples from the chapter or your own life where possible.

- According to the chapter, how can focusing on what you control help build resilience during a tough transition?
- Why does the chapter suggest building a support crew as a resilience strategy for handling transitions after high school?

Part 3: Reflective Activity – Applying Critical Thinking and Adaptability

Instructions: Think about a real or hypothetical challenge you might face after high school (e.g., balancing work and study, moving to a new city, or choosing a career path). Use the problem-solving steps from Chapter 4 to outline how you would approach this challenge. Write your responses in the spaces provided.

- **Challenge:** Describe the challenge you’re facing or might face.
- **Step 1 – Define the Problem:** Clearly state the specific issue at the core of this challenge.
- **Step 2 – Brainstorm Solutions:** List at least 3 possible solutions, even if they seem unrealistic or creative (use the “What if?” approach from the chapter).
 -
 -
 -

- **Step 3 – Evaluate and Choose:** Pick one solution and explain why you think it's the best option based on evidence or practicality.
- **Step 4 – Reflect on Resilience:** How can focusing on what you control or building a support crew help you stay resilient if this solution doesn't work out?

Part 4: Self-Assessment

Instructions: Rate your understanding of the concepts from Chapter 4 by circling the appropriate number (1 = Not Confident, 5 = Very Confident). Then, write one goal for improving a skill from this chapter.

- Understanding of Problem-Solving Steps: 1 2 3 4 5
- Understanding of Critical Thinking: 1 2 3 4 5
- Understanding of Resilience and Adaptability: 1 2 3 4 5
- **My Goal:** One skill I want to improve from Chapter 4 (e.g., creative thinking, asking for help) and how I plan to practice it.
